#### TEXAS TORNADO.

Every now and again we read of dreadful cyclones in some part of th United States. Hundreds of lives and thousands of dollars worth o: prop rty are annually destroyed in the western states. On the 3-th of April last a cyclone passed through the state of Texas which almost wiped out of existence the town of Cisco. Many perious were killed and hun-dreds injured. Most of the residents of the town are homeless and destitute. A more terrible state of affairs can hard y be conceived. The force of the wind can only be imagined ! y the following:-"Strong one story brick buildings with wails two feet thick were levelled to the ground, a whole freight train was blown from the track and demolished and severa hundred feet of track was torn up."

The result of such an appalling The result of such an apparing disaster can only be imagined in the faintest degree yet such tornadose pass over the western states year after year. The people of the Saskatier wan district may rejoice to know that their great heritage is free from wind storms, burricanes, Llizzards, terns does or cyclones

"It is not all gold that glitters." Aim to Improve Texas has for many years been held up before the world as one of the golden states of the American Union the appalling tarnado that has just passed over it laying waste the country and devastating and wiping off the earth whole towns, is only repitition of yearly occurences.

It is pleasont to note that ever American accounts acknowledge the wast superiority of the British men of war now in Hampton Roads. At first the eagle screamed considerably regarding the new United States navy and the show it would make, but the appearance of fine British ships has dersted the scream into a gentle

The new health act with which the British Columbians have fortified themselves against the coming summer is calulated to inspire confidence in the east. It provides all the modern machinery of a provincial and local board of health, which is the system that has been tound to work best anmost harmoniously wherever organized medical science has been collect upon to fight contigion.

So far-J-muse, February and March—the trade of Great Britain : \$62,000.000 behind that of the same period of 1891. Since last year, it has becreased \$3,000,000 during the three months. As free traders claim the expension between 1860 and 1975

The farmers are new leasily preparing the soil for the seed, and although the seeding will be sene what all righthan that of preceding years, the prospects for rapid growth are much more encouraging than for more encouraging than for more encouraging than for more encouraging than for more than that of preceding years, the prospects for rapid growth are much more encouraging than for more more more many years in the past. The same seems to have disappeared like megic, and with the very warm weather which has how will be very rapid. The futurer would do well to put in as large a copy as possible, as there is every prospect of a certain market for all the measure in committre where, in lead, it is likely to meet the usual fat it inconvenient proposals and by aughtered at the end of the session. of inconvenient proposals and be aughtered at the end of the session with the other "innocents."

Consul Taylor of Winnipeg is describe end came late on Friday afternoon ast. For the last eighteen months o wo years Mr. Taylor has been sufferin should be sown that has not been properly treated with blue-stone, it will pay the farmers much a term to raise a cop of smutted wheat. Such will be rejected, and thus be unsaleable. It is, therefore, important that the farmers should preparly prepare their wheat before sowing.

With the extension of the M. & N. W. R. the people may look farward to a large immigration and prasperity in every branch of business. From what we can learn upon good authority there is now every prospect that the M. & N. W. R. will receive an haid as will enable its extension this year and its completion next year this place. How many persons know that Ripans Tabules, now so largely advertised and used, are simply the favorite prescription of their family doctor prepared in a selectific manner and a form convenient for handling, conveyance, preservation and are? In the great hospitals of the metropolitan cities, where the wealth find better care than in their own luxuious homes, the ingredients of Ripans Tabules are administered to thousands of rich and poor nike with the neckenal effect. They are the main dependance to the most eniment physicians in cases of derangement of the digestive organs, such as dyapepeis, constipation, billiousness and other ill: connected with the stomach, liver and howels. For some years one of the principal hospitals in New York City has used a formula, differing slightly from the common one, that has been found of unusual efficacy. Through the commendations of physicians its mission of healing he been so widely and rapidly extending that it findly seemed deviable to prepare the prescriptions in a convenient form, so as to make it available to the whole public at moderate price, and to amounce the fact through the recognized medium for securing publicity—advertisements in the c lumns of the newspapers of the land. This has been lume, and now the time is not for distant when every family of intelligence will be as certain to poss as a supply of Ripans Tabules as clock or a cooking towe. They are already to be found on sale shoots everywhere, and any druggistor dealer will supply them. A box, containing six viola, is sold for 75 cents, and a gros package, containing four boxes, for \$2. They will be sent by mail, post paid, to any address on receipt of price, by the Ripans Chemical Company, No. 1 Spruce St., New York.
